PROFILE

Frontend Engineer / Web Developer with a background in Mechanical and Mechatronics Engineering and hands-on experience building responsive websites and web applications using React, Next.js, JavaScript, TypeScript, and Tailwind CSS. Experienced in translating designs and client requirements into functional user interfaces, working with REST APIs, and collaborating across development and testing workflows. Analytical, adaptable, and committed to continuous learning and delivering practical software solutions.

PROFESSIONAL EXPERIENCE

Kalority Ventures

Frontend Developer

09/2025 – 08/2026 | Nairobi

- Built the Enssy Enterprises website from scratch using HTML and Tailwind CSS, translating client requirements into a responsive interface and contributing to testing and deployment.
- Improved the SAVIX website by optimizing existing CSS, restructuring the pricing page, and adding a purchase and inquiry workflow with a form integrated through EmailUS.
- Contributed to the React-based rebuild of the SAVIX MIS admin interface using TypeScript, Vite, and Tailwind CSS, including navigation, tabular layouts, and data tables with TanStack Table.
- Developed the SAVIX Billing application from scratch with React, TypeScript, Vite, and Tailwind CSS, contributing to billing accounts, invoices, tier management, and role-based access control.
- Connected and tested frontend workflows with backend services through API mocking and Postman, while contributing to debugging, Git/GitHub collaboration, testing, and deployment.

Kalority Ventures

Frontend Developer Intern

01/2025 – 09/2025 | Nairobi

- Rebuilt the Kalority website from existing HTML and CSS, improving its structure, responsiveness, and interactivity based on Figma designs.
- Designed and developed the SAVIX Suite and SAVIX IG pages from scratch, translating designs into responsive web interfaces.
- Contributed to the SAVIX MIS application by modifying frontend workflows, testing API endpoints with Postman, and using mocked data to validate application functionality.
- Participated in testing the SAVIX Group mobile application using Android Studio, adding translations and validating application functionality during testing.
- Supported debugging, testing, and deployment activities while working with Git/GitHub and gaining hands-on experience across React, Next.js, Angular, Node.js, and REST APIs.

Upwork

Freelance Frontend developer

2021 – 2024 | Nairobi

- Developed responsive web interfaces and applications using HTML, CSS, JavaScript, React, and other modern frontend technologies across freelance and collaborative projects.
- Built the WinkLink Water Solutions website, initially using HTML, CSS, and JavaScript before transitioning to Tailwind CSS, Next.js, and TypeScript to structure page layouts, navigation, and responsive sections; the project was paused before deployment and is planned for continuation.

- Implemented a functional signup page from a Figma design, including form submission and interfaces for viewing, editing, and deleting submitted records.
- Developed the supporting Express.js server and REST API endpoints for creating, retrieving, updating, and deleting signup records.
- Contributed to debugging, deployment, and collaborative development across React, Next.js, and Vanilla JavaScript projects while continuing to expand frontend development skills.

Wink link ltd

Sales & Technical Support Assistant

2018 – 2020 | Nairobi, Kenya

- Started in sales, supporting the sale and distribution of water treatment chemicals and equipment while assisting customers with their product requirements.
- Managed day-to-day operations of the clean-water shop, coordinating water sales, customer orders, and deliveries to customers and designated locations.
- Maintained and updated product pricing and sales information using Microsoft Excel spreadsheets.
- Conducted field surveys and water-quality assessments to help identify water treatment requirements and recommend appropriate solutions.
- Assisted with maintenance and troubleshooting of water treatment equipment, providing technical support to customers when required.

PROJECTS

Kalority Ventures Website [↗](#)

Rebuilt the company website from existing HTML/CSS and developed responsive pages and SAVIX sections from Figma designs.

Technologies: HTML, CSS, JavaScript, Tailwind CSS

Enssy Enterprises Website [↗](#)

Built a responsive business website from scratch to showcase the company's services and capabilities based on client requirements.

Technologies: HTML, Tailwind CSS

SAVIX MIS Website [↗](#)

Contributed to the existing SAVIX MIS application by working with its frontend workflows, API interactions, testing, and mocked data during development.

Technologies: Angular, JavaScript, REST APIs, Postman

SAVIX Billing [↗](#)

Contributed to a billing application for managing billing accounts, invoices, tier management, and role-based access.

Technologies: React, TypeScript, Vite, Tailwind CSS, REST APIs, TanStack Query

SAVIX MIS — React Rebuild

Contributed to the rebuild of the SAVIX MIS admin interface using React, TypeScript, Vite, and Tailwind CSS, including navigation, tabular layouts, and data tables.

Technologies: React, TypeScript, Vite, Tailwind CSS, TanStack Table

WinkLink Water Solutions Website

Developing a responsive business website with reusable layouts, navigation, and major content sections using a Next.js-based implementation.

Technologies: Next.js, TypeScript, Tailwind CSS

EDUCATION

Professional Development

Online Courses – Udemy

2019 – present

- Studied web development and software engineering topics including JavaScript, React, Next.js, Node.js, Express.js, and TypeScript.
- Applied concepts from online learning through personal, freelance, and professional development projects.
- Continuously developed frontend engineering skills through hands-on practice and real-world software projects.

Bachelor's Degree in Mechanical and Mechatronics Engineering Technology

Technical University of Kenya

08/2016 – 09/2022 | Nairobi, Kenya
